

# Step Therapy

## Clinical Edits for the Essential Drug List

Step therapy is a program that helps you and your doctor choose medications that are right for you. After studying many drugs, we've chosen certain ones to be the first drugs to try when treating some conditions. Trying drugs in a step-by-step way is called step therapy. When your doctor prescribes a drug that requires step therapy, a message is sent to your pharmacy's computer. This lets the pharmacist know you must first try a different, similar drug that's covered by your plan. The pharmacist will call your doctor to get a prescription for the new drug.

Here are the medications included in the step therapy program. Find your condition or type of drug in the first column.

The second column lists the medications that step therapy is required for. If you are taking a medication on this list, you may need to try another medicine first. Preferred alternatives – which are proven to work well for most people and may be more affordable – can be found on our Drug Search tool when you log in at [anthem.com](http://anthem.com).

## LEGEND

**PA** = Prior Authorization. Some drugs need to be reviewed and approved before they're covered by your plan. This process is called prior authorization. It looks at drugs that may have harmful side effects, the potential for incorrect use or abuse, options that work better and cost less, and/or guidelines for use with certain conditions.

**QL** = Quantity Limits. Taking too much medicine or using it too often is dangerous and costly. That's why this program may limit how much of your medicine you can get each month. For example, a drug may have a limit of 30 pills for 30 days.

**ST** = Step Therapy. Step therapy means you try medicines in a step-by-step process. The program may require you to start with one medicine before another can be approved.

**DO** = Dose Optimization. This program may change the dosage of your medicine to make it more effective. For example, you may have to start taking a higher dosage once a day rather than a lower one twice a day.
