

UnitedHealthcare - Pharmacy Benefit

Prior Authorization/Medical Necessity

The following is a comprehensive list of medications that require Prior Authorization/Medical Necessity, meaning physicians must provide additional clinical information to verify member benefit coverage. The Prior Authorization/Medical Necessity program is available for groups with language that allows coverage determinations based on medical necessity. **Prior Authorization/Medical Necessity is not a replacement for Prior Authorization/Notification, but an additional program.** Groups with the enabling language will have both Prior Authorization/Notification AND Prior Authorization/Medical Necessity. Where a medication is included in both programs, Prior Authorization/Notification and Prior Authorization/Medical Necessity, the Prior Authorization/Medical Necessity program will be utilized.
